

Labelling and Safety Solutions

MezzNets™ Safety Netting

MezzNets™ mezzanine floor safety netting creates a barrier between the edge of the mezzanine and the ground below, subsequently preventing any stock falling between the railings and potentially injuring employees.

MezzNets™ are made from high-tenacity polypropylene which is lightweight, incredibly strong and almost impossible to damage during normal operation.

Available to suit single and multiple storey applications, MezzNets™ offer the flexibility of floor-to-handrail and/or floor-to-ceiling protection – all of which can be incorporated into new installations or retro-fitted with minimal disruption to your customers processes.

We offer a hassle-free yet comprehensive installation service carried out by trained professionals. All MezzNets™ arrive on site pre-cut to size to further speed up the installation.

- Creates a safer working environment for staff
- High-tenacity polypropylene stitched cord
- Made-to-measure and available in a variety of colours
- Easy to retrofit and easily removable and cleanable
- Free site surveys
- Nets, cables & fixings are tested to withstand high impact loads
- Installation carried out by trained and regulated installers
- Now also available in a 10 metre easy-fit package – only £74.95+vat

MezzNets™ – Handrail Netting

Ensure a safer working environment for your customers staff and reduce damage to their stock by installing MezzNets™ between mezzanine floors and the top handrail.

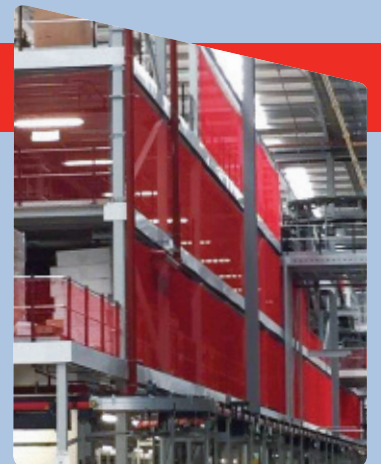

Suitable for single storey and multiple storey applications, MezzNets™ – Mezzanine Handrail netting installs quickly and easily with the aid of easy-to-use cable tie fittings, or the Gripple wire net system. Made from 2.3mm high-tenacity and durable polypropylene stitched cord, it affords a strong, effective and easily maintained barrier – enhancing workplace safety and eliminating the replacement costs associated with other mezzanine protection systems.

MezzNets™ – Floor-to-Ceiling Netting

Full-height mezzanine protection systems prevent products being pushed or thrown from upper mezzanine floors – protect workers from products falling from height.

MezzNets™ Floor-to-Ceiling Netting offers complete peace of mind by preventing products at above and below hand rail height from falling and injuring staff and damaging products. The netting is highly robust, damage resistant, and comes in a variety of grades to suit the type of stock that needs to be retained. All MezzNets™ are easily fitted by means of cable ties or our advanced Gripple cabling system that is renowned for its strength and integrity. Our services includes full survey and associated drawings to ensure the best fit for us to install.

Ask us about our MezzNets™ – Catch Net Systems

– designed to be fixed under mezzanine floor to catch product falling through on to pedestrians.
